Thank you very much for purchasing and using our products. When you receive the product, please do not install the product directly on the car, because the product may affect the product after a long journey. Therefore, please test the machine before installation to ensure the normal use of the product.

before installation.

Test method: Take the machine to the battery on the car and test it. This car stereo is suitable for a mains voltage of 12V DC, connect the red and yellow wires to connect the machine's power wires together and to the positive side of the battery. The black wire of the power cord connects to the negative terminal of the battery. After waiting for 10 seconds after the connection, press each button of the machine to see if the machine can be turned on normally. If it can be turned on, it means that there is no problem, and the machine can be installed. If the test machine does not start normally, please confirm again that you strictly follow our test method steps.

If the problem is still not solved, please contact the customer service of the store, we will solve the problem for you in time.

Thanks for your cooperation.

## Technology and Support

- ① Universal size can be installed 178X100mm, 178X102mm, 188X116mm. The random product has matching mounting brackets and screws, and the modified instrument panel requires technicians to install and fix it. ) please consult the merchant.
- ② This product is used in 12V cars, the working voltage range is 9V-16V, and cannot be used in 16V cars. So as not to burn machine parts. The power is 10A, and the sound is intermittent when the sound is loudest, indicating that the output voltage of the car is insufficient rate.

### ③ Power wiring method

I The yellow line B+ is connected to the normal power of the car (the positive electrode of the battery)

II Red wire ACC access (key switch positive)

III Black GND negative connection (battery negative)

IV. Purple BACK (rear camera trigger)

V Orange + ILL (night running light display)

VI. Blue ANT (radio enhanced power supply, please ignore if the original car does not have this function)

VII Pink KEY1 steering wheel control wire

VIII Green KEY2 steering wheel control line. (The original steering wheel has no buttons, please ignore 7 and 8 to use)

Note: The remaining 8 wires without signs are 4 groups of speaker amplifiers. Those with the same color are a group.

los que tienen el mismo color son un grupo.

- ④ When the 4G network card is inserted for the first time and the card is not read, please check whether the position of the card slot is correct. If it is correct, you need to reset and restart. Use a sharp object to top the RST or click the restart icon on the desktop.
- ⑤ When the machine is in use, when there is a stuck phenomenon, due to the excessive use of programs, you need to slide down the screen twice and click to clear. You can resume normal use.
- ⑥ When the above 5 parts have not solved the problem, downloading too many applications or applications that cannot be used normally will have a great impact on the operation.

Solution: Car Settings - System Settings - Factory Reset - Clear All Content - 1234

- ⑦ The heat sink on the rear cover of the machine is made of aluminum alloy, and it is normal to emit high heat when the car is working at the maximum volume. Be sure to worry. Please use it normally.
